Now you can edit a dimension in a view of a 3D model and immediately see the change in the 3D model. Now you can import a 3D model directly from the Internet. This can speed up the design cycle because you don't need to first create a 3D model in 3D Modeling software, like SketchUp. Making the last move to your drawings. (video: 2:40 min.) When you insert a 3D model, you can make the model editable from a Design Perspective. Add a legend to show material names, color specifications, and more to parts in your 3D model.
