---

Qualifiers just ended today and we have some exciting news! We are announcing The International Qualifiers for Dota 2 that will begin January 30th 2013 and concluding on February 5th 2013 at our home and studio in Copenhagen, Denmark. The tournament will take place at our gaming house known as YC Studio with a prize pool of \$86,400 and 32 competitors. The qualifiers is open to all players from all nationalities except China. We hope to have a large turn-out of players from around the world and fans will be able to watch the event on the Dota 2 livestream and follow us on facebook and twitter. The original Dota tournament was built on the developer's vision that the future of esports are free to 3a67dffeec

### What's New in the?

NEW ENHANCED DYNAMICS. Whirls, globs, and spikes of color swirl and pulse across your graphic space, giving it a "life of its own" animation. The dynamic process is guided by a powerful pallet of dynamic novas. CREATE EVEN MORE BEAUTIFUL, DYNAMIC VISUALS. Choose from one of three graphic palettes or create your own palette. This "preview" feature allows you to preview how your colors will look and animate on your desktop. ADD INNOVATIVE FEATURES THAT IMPROVE YOUR DIGITIZATION. Customize your tiling, registration, and drawing. Create your own grid. Set rules about how to register text, set aspect ratios, and set the orientation of your tiling. ACCESS TO DIGITAL OPTICAL PROFESSIONALS. Chat with a qualified tutor to learn about your workflow. Access to a library of files to learn from and go over commonly used effects. Show off your skills, even if you're not a designer. Novamatic 2000 can help you work and create stunning images from a distance. Navigate this add-on with the hotkey '[Ctrl]-[1]' in Windows and Mac, or '[Shift]-[1]' in Mac. For a list of other keyboard shortcuts, click here. October 2012: Version 2.0.7 : - static registration can now be "flipped". - New interface with new features: - click on each nova to select them. - move the nova and scale them - resize or create a new row - The order in which the novas are added to a line/row can be set by placing them in the Palette. - A tray icon has been added to show the order of the novas added to the row/line - novas can be "flipped" by dragging them. Version 2.0.8 : - added a new image browser which can be used to display local files. - nova creation can now be done automatically for most of the image files. - added a nova option in the preferences panel. - description nova can be customized with themes and change their color - all graphic options can be changed in the preferences panel. September 2012: Version 2
