Combining all natural ingredients that cleanse the skin and promote natural immunity, Viagrow combines three essential tools in one amazing formula to help you get the most out of your skin care regime: alkaline pH balanced skin care, garlic extract, and a lemon juice supplement to help boost your immune system. Before I dig into the nitty gritty of Viagrow, it's important to understand the functions that these three ingredients will perform in the products, and more importantly, in your skin. The importance of alkaline pH balance So, before we dive too deep into the ingredients and functions of Viagrow, I wanted to touch briefly on the first ingredient: pH balanced skin care. Every living cell in your body must maintain a neutral or alkaline pH value, which helps keep your immune system, digestive system, and other systems functioning optimally. Your skin is no exception. The pH of your skin can be anywhere from 4.5 to 7.5. Unfortunately, most skin care products that you buy at the drugstore are not going to provide the same type of nourishment your skin needs, and many body care products that are created with natural ingredients are not going to provide the alkaline pH balance that your body and skin need. A pH balanced skin care formula helps to nourish your skin and begin to balance the acidic nature of your skin and body, by providing beneficial ingredients that are alkaline in nature. Garlic extract In addition to helping to repair the damage that can occur to the skin as a result of various things such as sun damage, dryness, and hormonal imbalances, garlic is also an invaluable addition to the category of natural immune boosters. Garlic contains a compound called "Allicin" that is responsible for many of the beneficial effects that we know garlic can have on the body. "Allicin" is absorbed more effectively into the skin by making it more alkaline than it d41b202975
