updates and describes the process of upgrading the IBM Storwize.1. Field of the Invention The present invention generally relates to an air conditioner that can be mounted in a vehicle interior, and more particularly to an air conditioner having an improved blow outlet for blowing air to a vehicle interior side. 2.

Description of the Related Art Japanese Patent No. 3040997 (hereafter referred to as “patent document 1”) discloses an air conditioner having an intake port unit and a discharge port unit (both will be referred to as an “air conditioning unit”) mounted to a side of an air conditioner case. The air conditioning unit includes an air

---

conditioning case, an air mixing door, and a partitioning door.

The air conditioning case is connected to the intake port unit. The air mixing door is connected to the air conditioning case and is arranged so as to be rotatable.

The partitioning door is provided so as to be rotatable and can be closed by its rotational movement. The partitioning door is connected to the air mixing door by a connecting hinge in order to be closed. The air conditioning case and the partitioning door are used to partition a first interior side space. The air mixing door is used to divide an air stream flowing in the first interior side space into different

---

directions. Air streams flowing in the respective directions are blown from discharge outlet openings of the
