About Gamescom 2018 Gamescom 2018 is returning to Cologne, Germany, from August 21 to 27. It is the biggest trade show for video games in the world, uniting publishers, developers, and the gamers! We will have the new video game, The Ball, on Steam for PC and Mac on the E3 show floor. For more information, visit the Gamescom website at: www.gamescom.com. Apple is a trademark of Apple Inc., registered in the U.S. and other countries. PSA 10 Code This is a Public Service Announcement (PSA) with regards to Game Factory's 10 Code promotion. The standard promotion allows for 10 codes to be given away for the price of \$20.00 Recently announced, we have extended the standard promotion to include 50 codes. It currently costs \$45.00 to win the 50 codes. Therefore, the standard promotion is no longer the cheapest option for anyone with 10 codes. Unfortunately, we did not wish to expand the game beyond what we currently have and we apologize for the inconvenience. Those who have entered our 10 codes in the past have expressed their interest in receiving their codes once the expansion has concluded. Our decision is to run the 50 codes promotion for as long as it takes to sell out. We understand how disappointing it must be to purchase a game which costs only \$20.00 and receive 50 codes for free. We would prefer to refund your money, but this would undermine the games promotion. We made this decision based on the fact that we have a limited amount of expansion material and it would be more efficient to sell them both as a bundle. This is the largest expansion to date and we cannot provide you with a refund. We will post an announcement on our website shortly and will keep you updated as events unfold.Q: How to inject header variable value to view in Laravel 5.3 I would like to inject header variable to my view but I found how to inject that to controller
