U.S. Pat. Nos. 6,508,733 and 6,507,728 disclose a fuel injector having a valve needle and a spring biased valve element that is biased to a closed position, but is movable to an open position. The valve element is biased to the open position by a compression coil spring. The valve element is positioned at an end of a valve needle and is movable by a valve needle stem. When the valve needle stem is operated to open the injector, a compression spring is placed in tension and urges the valve needle to the closed position. In the design of these patents, the valve needle stem is attached to the valve needle such that the stem will urge the valve needle into the closed position. The stem is driven by a solenoid that is controlled by an electronic control system. To open the injector, the solenoid is energized which moves the stem and the valve needle from the closed position to the open position. To close the injector, the solenoid is de-energized and the spring acts on the valve needle to retain the valve needle in the closed position. During opening of the injector, the valve needle may move to a position wherein the valve needle is caught by the valve seat. If the valve needle is pushed into the valve seat, the injector will continue to open even though the solenoid has been de-energized. To ensure that the valve needle does not contact the valve seat, the patent discloses a shoulder on the stem that engages the valve seat such that the valve needle cannot be moved closer to the valve seat than the stem. When the stem approaches the valve seat and starts to contact the valve seat, the shoulder on the stem contacts the valve seat and prevents the valve needle from being moved closer to the valve seat. In this design, if the valve needle is caught at the valve seat, and then does not advance to the valve seat, the shoulder on the stem will contact the valve seat to prevent the valve needle from moving. The shoulder prevents the valve needle from being trapped by a close valve seat, but it does not prevent a valve seat from being opened by the valve needle. The shoulder does not prevent the valve needle from being depressed into the valve seat, but the valve needle is required to contact the shoulder or the valve seat and thereby open the valve seat. The shoulder also increases the complexity of the injector and the cost of manufacture. The present invention is directed to overcoming one or more

The official Twitter account for director Ken Sangha's *You're Under Arrest! The Movie 2: Double Trouble!* project has announced that the manga/light novel adaptation will get a TV anime adaptation. The new anime will be the first season of a planned anime trilogy. The manga centers around the second story of the *You're Under Arrest!* TV anime. The first story of the *You're Under Arrest!* TV anime takes place before the events of the light novel, and centers around the relationships between the police's *You're Under Arrest!* sub-department, "U-Precinct," and the members of the Public Security Section 1 (PSS-1), a department composed of the most famous criminals from the previous series. The second part of the story will take place during the events of the *You're Under Arrest!* light novel, and will center around PSS-1 officer Kazuya Shinya. Kazuya Shinya, a rookie officer in the PSS-1, is accused of assault against a PSS-1 superior officer. Kazuya agrees to be a witness in the superior officer's case, but when he is in the courtroom, he is confronted by a former PSS-1 detective, Mondo Akabane, who is now a judge. Since Kazuya's testimony is a game-changer, Mondo assigns Kazuya to a case that will have some connection with the superior officer's case. From there, Kazuya will have to decide his fate with his comrades at the U-Precinct. The anime is a collaboration between Studio Trigger and Tomorrow. The same team is working on the anime adaptations of the original *You're Under Arrest!* light novel series by Tsukasa Fushimi, *Oh, my Goddess!* author Naho Toyama, and Naoshi Komi, as well as the *You're Under Arrest! Side Story!* manga by Toyama and the same team. *You're Under Arrest! The Movie 2* will open in Japan on January 18, 2015. [Via Ota-suke]Q: How to store generator objects in a dictionary?
