You then edit the following file: C:\Program Files (x86)\Steam\steamapps\common\Counter-Strike Global Offensive\csgo_log.txt (you might not have this path, the path above is just for reference) and change the following: IP=local With this being the IP of your machine, it will log the game to the csgo_log.txt file. How to find the IP of your machine For Windows 8 you can follow these instructions: Go to Windows. For Windows 7: Open the Run window. Type in cmd or press Win + R. Type cmd and hit enter. Type ipconfig. Find the IP address at the end of the list, which will be like 192.168.X.Y (X can be any number, for example 1, 2, 3 or 4). This is your IP address. How to find the IP of the server For Linux, the IP of the server would be the public IP address of the server. For Windows, run ipconfig, find the IP address in the "IPv4 Address" column, and put it in the IP in the preceding steps. To turn on or off the IP logging in CSGO Delete the file C:\Program Files (x86)\Steam\steamapps\common\Counter-Strike Global Offensive\csgo_log.txt. Run the game, and you should have working game logs again. #4 CSGO Anti-Cheat MAC (Credit: CSGOLive) CSGO Anti-Cheat is a software which can be used to detect cheaters in Counter Strike: Global Offensive games. It is a tool developed by Valve Corporation. Although it seems to be a simple tool for cheating detection, CSGO Anti-Cheat shows that it was actually developed with a lot of care and attention. Even though it is made up of just one executable file, it consists of many features. How to find the IP of the server Use the above instructions to find the IP of the server. How to find out the client Most servers that run out of a dedicated server host can have a public IP address, and this public IP address can be found in the client list of your server. You can search for the public IP of the server you are playing on. Then you will be able 6d1f23a050
