I'm trying to write a query that returns the customers and the name of the product they own with their product\_id. My query so far looks like this: SELECT c.`customer\_id`, c.`first\_name`, c.`last\_name` FROM `customers` c INNER JOIN `products` p ON c.`product\_id` = p.`product\_id` WHERE p.`product\_id` = '1'; This query returns a number of customers with the product\_id's that they own but I also need to return the product\_name associated with the product\_id. Is there a way to do this with a single query? A: You can use GROUP\_CONCAT to join two tables and get one row per customer: SELECT c.`customer\_id`, c.`first\_name`, c.`last\_name`, GROUP\_CONCAT(p.`product\_id`) as product\_id, p.`product\_name` FROM `customers` c INNER JOIN `products` p ON c.`product\_id` =
