The James H. Carson Memorial Writers Workshop will offer a week-long residency for five writers, to be held in Virginia's Blue Ridge from June 4-10. We talked with Camille C. Brown, a native of Roanoke, Va., about her forthcoming book, "Mountain Voices," which reflects on the history of the mountain people of the Blue Ridge. The book is a look at the region's experience with the Mountain County Health Service, which became Blue Ridge Mountain Community Health

Services in the 1970s, providing health care to rural areas. The book has a strong focus on the history of healthcare in the mountain area. She was the second executive director of BCMCHS. My parents were very open to their community, and I spent a lot of time around the county hospital, sitting on stretchers, and talking to people. In college, I started to question how rural

healthcare is handled in the U.S., and it became a growing interest in me. I did my master's thesis at the University of Virginia and completed my PhD at Duke. In graduate school, I started writing about these ideas. Q: The book begins in the late 19th century. What is the significance of that era for the health care system? A: Before the Civil War, doctors were usually not well-trained or educated. They were often foreigners who came to the mountains to practice medicine. They came to the mountains because there was a demand for healthcare. There were also important quarantines in the states and the county hospitals were needed.
