After Share for Review sends feedback to Photoshop CC, the app displays the results of your edit directly in the app bar, giving you access to any changes without going to File > Edit > Edit in Photoshop CC. You can also use the Help > About Photoshop CC > Your Version number to find the exact version of Photoshop CC being used, so you know if you're using an approved change and can make the desired changes before adding a current version number to your comments. Share for Review estimates the effort required and the number of workdays to use the product for the first time (based on five years experience). When you purchase a license on the Sketch Store, you can decide how much of a discount you'd like to receive, also extending the estimated number of workdays. You can choose to assign a review to a dedicated category or give your customers the option to respond to the thread in general. Once you've assigned reviewers the right to view your product, your product's thread will become public, so your customers might share their feedback with other users in the comments. To protect your product and profile page, you can also restrict access to your review thread if needed. Once you've posted a review to Share for Review, your customers can launch it within Photoshop CC and respond to it if they like. Once Adobe accepts your review, all comments and feedback will be reviewed against your file and displayed in a new comment window within Photoshop CC. All items of feedback will then be organized by company, product, and by customers' and reviewers' general feedback.
